SUBSTANCE OF INTERVIEW UNDER §713.04

Sir:

In accordance with §713.04 of the MPEP, it is respectfully requested that the following written statement as to the substance of a telephone interview for the above-referenced patent application be made of record.

1. An Applicant initiated telephone interview occurred on January 19, 2005 for the above-referenced application.

The Commissioner for Patents

2. The participants for said telephone interview were Sam K. Ahn, Patent Examiner; Young Tse, Primary Examiner; C. Marc Benoît, Agent of Record; and Alexandre Abecassis, Agent in training.
3. No exhibits or demonstrations were shown during the interview.
4. The only claims discussed were claims 1 and 14.
5. The prior art discussed were US patent N°6,205,133 and US patent N°6,072,994.
6. Applicant argued that claim 14 should be allowed as it is believed to recite similar limitations as claim 1 which is allowable.
7. Examiner stated that in order to be allowed, claim 14 should add limitations which are similar to the limitations *"receiving a request for a specific frequency band and setting a tuning frequency of a selected one of said plurality of tunable down converter units, setting filter parameters of a selected one of said plurality of tunable filters and setting said switch"* disclosed at lines 14-17 of claim 1.
8. It was agreed that an amendment to claim 14 would be filed and in accordance with point 7 and that this would be acceptable to overcome the rejection based in view of US patent N°6,205,133 and US patent N°6,072,994.

Respectfully submitted,

C. Marc Benoît (Reg. 50,200)
Agent of Record

The Commissioner for Patents
